Eight Generations of Boatbuilding

E.M. Crosby Boatworks is proud to introduce its latest endeavor...a 24' cold-molded (wood/epoxy construction) center console. Designed to easily navigate the sheltered waters of the three bays, or to safely and comfortably zip over to the Black Dog Tavern for breakfast, the Crosby 24 is a virtue of all around versatility and style. We set out to develop a boat that is safe and manageable for the entire family to go water-skiing in North Bay, anchor and swim at Sampson's Island, or fish Horseshoe Shoal.

Every inch of our 24' is built locally and by hand; therefore, it is effortless to customize the boat to both your needs and desires.

Whether you're a fisherman, a beachgoer, or a cocktail cruiser, we can build the ultimate Crosby 24' for you.

And because our boat is "cold-molded", your passengers will enjoy the solid feel and sound of a wooden hull, while benefitting from the maintenance characteristics of a fiberglass boat at a competitive price point. Our 24' will appeal to the discerning buyer, who appreciates the highest quality craftsmanship, as well as a "local building experience."
